

GREY FOX CONCEPTS

1/16 M113 reflectors x4  
SKU: GFC160027

**Description:** Australian Rear Reflectors and the measurements for the front and rear reflective tape measurements for one M113 vehicle.

**History:** The M113 rear reflectors were mounted on the rear track guards on both sides. Introduced in the 1970's, they were added to meet updated safety requirements for the M113 FOV to operation on Australian roads. Included in these updates were red & white reflective tape on the sides of the hull. See instructions for placement for both.

**Parts:** One set of Australian Rear Reflectors and the measurements for masking the front and rear reflective tape for one M113 vehicle. This update/correction kit is suited to the Andy's Hobby HQ, M113A1/M113A1 ACAV AHHQ-009.

**Safety:** This is a 3D printed resin product. When working with this product, take precautions to prevent inhalation of the dust produce by cutting, sanding or filing. Wearing a dust mask and eye protection while working on the product. Work in a well-ventilated area.

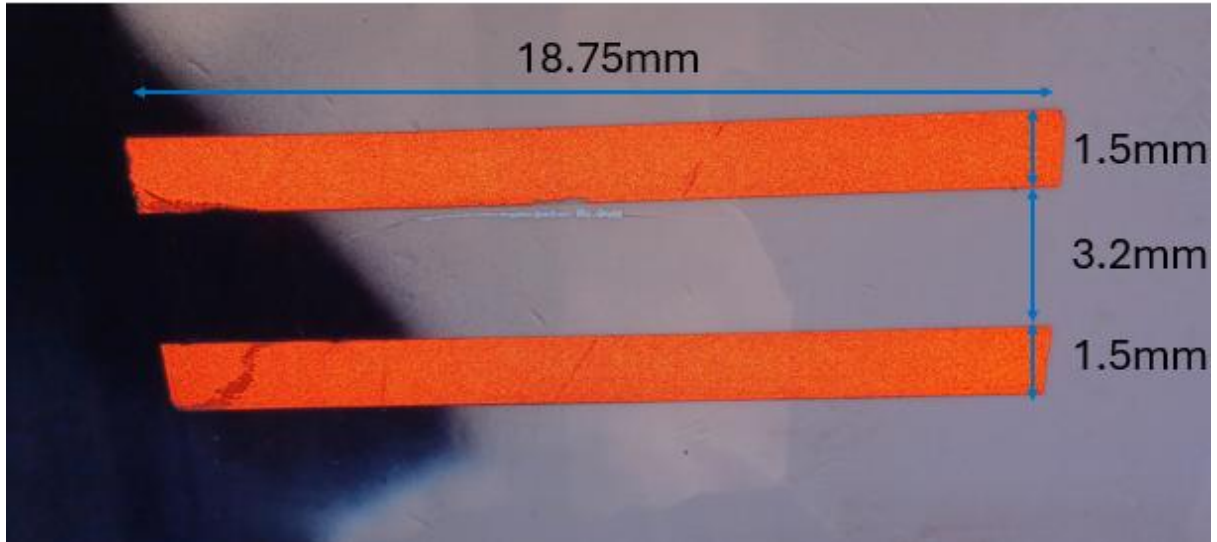

**Instructions:**

The rear reflectors were mounted on the bottom of both guards. The placement of the reflectors varies over time due to the different styles of rear jerry racks. Check your reference before fixing.

Figure: 1

The red & white reflective tapes on the sides of the hull. Both sides of the front of the vehicle had the white reflective tape. Both sides of the rear had the red reflective tape. The placement of the reflective tapes did vary slightly over time. The dimension of the red and white tape were both the same and didn't change. Check your reference before masking and painting. The measurements in Figure 2 are convert to 1/16.
